WORK EXPERIENCE

BentoBox (acquired by Clover) **DEC 2020 - PRESENT**
Senior Web Designer

- Design and build custom, responsive websites for restaurant and hospitality brands, taking each site from visual direction and layout through build, QA, and launch across dozens of concurrent projects a month.
- Translate each client's brand into a distinct site through typography, color, photography, and page layouts built around menus, online ordering, reservations, and events.
- Lead design conversations directly with owners and marketing teams, scoping requirements, presenting direction, and refining through revisions to launch.
- Extend designs beyond the platform's native templates with custom CSS and JavaScript, and set the front-end standards the design team builds to.
- Own the company's VIP and churn-risk accounts, retaining every one over the past two years, and serve as the team's escalation point for responsive, accessibility, and third-party script issues.
- Run design reviews, mentor four designers, and author the training docs and platform limitations reference used to standardize builds.

Beyond Belief Web Design **AUG 2020 - PRESENT**
Owner/Developer

- Design and hand-code custom websites for local service businesses in HTML, CSS, and JavaScript, built on Astro and deployed through Netlify and Git, with no templates or page builders.
- Manage local SEO and analytics for clients: keyword research, site architecture, Google Business Profile management, Search Console monitoring, indexing diagnostics, and monthly performance reporting.
- Handle all ongoing site maintenance, including content updates, dead link checks, page speed and accessibility fixes, and CMS integrations.
- Direct branding and identity work, from logo design through marketing collateral and social media assets.
- Train non-technical business owners to manage their own content and walk them step by step through domain registration, DNS, hosting, and email setup.
- Run every part of the business, including client acquisition, project scoping, timelines, and vendor relationships.

Internet Creations **JULY 2019 - DEC 2020**
Graphic Designer

- Designed and managed web pages for the company website using Salesforce Community Cloud, ensuring a seamless user experience and alignment with brand standards.
- Developed and maintained Marketo landing pages to support marketing campaigns, optimizing conversion rates and achieving campaign goals.
- Supported the marketing team in achieving objectives such as product launches, event promotion, and brand identity through the creation of visually compelling design assets for web and print.
- Conceptualized, initiated, and implemented the company's social media strategy, building brand awareness and engagement through original online content.
- Produced, filmed, and edited video and photo content for promotional purposes, enhancing storytelling and audience connection.
